DEVENDRA PATANI

has successfully completed the online, non-credit Professional Certificate

IBM Applied Al

This Professional Certificate provides a firm understanding of Al, its applications, and its use cases. Learners have become familiar with IBM Watson Al services and APIs. Learners have also grasped how virtual assistant technology works as well as built and deployed an Al powered customer support chatbot on a website. Learners competing this specialization have picked up practical Python skills to work with Al and have used IBM Watson Al services and APIs to create smart applications. They have become familiar with Computer Vision, Watson Visual Recognition and OpenCV and have used them for image processing and creating custom image classifiers. Learners have also demonstrated their proficiency in applied Al by completing several hands on projects.

Introduction to Computer Vision

with Watson and OpenCV

Python for Data Science and Al

Building Al Applications with

Watson APIs

Building Al Powered Chatbots

Without Programming

Getting Started with Al using

IBM Watson

Introduction to Artificial

Intelligence (AI)
